

How to use this deck

How should I use this deck?

This deck was created for Twilions to use in customer conversations to position our new platform capabilities following the GA launch at SIGNAL 2026.

This deck is based on the Challenger methodology with the goal of:

- Breaking down your customer's current mindset—the status quo is not an option
- Get them to take action with you and Twilio

How to use this deck

1. Develop a pitch in Highspot
2. Review and customize the slides and speaker notes
3. Remove this slide and delete any green guidance boxes
4. Practice in your voice and present to the customer

Note that this source deck changes often based on feedback, so we recommend always referring back to the Highspot link.

Questions?

This product narrative was developed by the Product Marketing team with support from cross-functional partners in R&D and GTM.

Rebuilding customer experience for the AI era

Legal disclaimer

This presentation contains confidential information of Twilio Inc. (“Twilio”) and is subject to any confidentiality obligations you may have to us. This presentation is solely for the use of the persons to whom we make it available and may not be disclosed, reproduced, or further distributed, in whole or in part, for any purpose.

This presentation and any accompanying discussion may contain forward-looking statements within the meaning of federal securities laws. Investing in Twilio, as well as the information contained in these statements involve substantial risks and uncertainties as further described in our most recent periodic reports filed with the SEC, including our Annual Report on Form 10-K and subsequent Quarterly Reports on Form 10-Q, which are available on our website and at [sec.gov](https://www.sec.gov). Past performance is not indicative of future results. Any description of features, capabilities, or other aspects of our current or future products and services is not a guarantee that these products and services will be developed or made available as described, or at all.

This presentation may contain statistical data, estimates and forecasts from sources inside and outside of Twilio. AI fails on broken infrastructure

Conversations
restart when the
channel changes

No coordination

Systems ask for
information that
customers already
provided

No context

Insights can't be
used in the moment

No actionability

Most software
is siloed
and locks you in

No connection

The customer pays the price for fragmentation

Flight delay:

Flight 9874 has been delayed. Contact our support team or open your OWL Airlines app for more options. Learn more: <https://owlairlines.com/flightdelayFAQs>

Your OWL Airlines verification code is 456765

Hello, thanks for contacting OWL Airlines chat support. How can I help you today?

Please provide your full name and confirmation number.

Let me transfer you to an agent who can help.

Hi, this is Armand with customer care. How can I help you today?

Explore Offers

**When systems
are fragmented,
every team
feels it**

Imagine one continuous conversation that builds on the last

Twilio Conversations

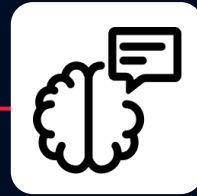

A foundation for driving customer lifetime value through every interaction

Conversation Orchestrator

Turn fragmented interactions into one continuous conversation

Coordination

Conversation Memory

Shared customer memory so every interaction picks up seamlessly

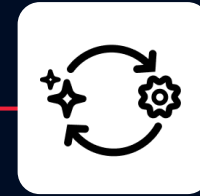

Context

Conversation Intelligence

Surface – and act on – intent, sentiment, and risk in real time, across channels

Actionability

Agent Connect

Deploy AI across channels without brittle integrations or platform/vendor/model lock-in

Connection

Conversation Orchestrator

GA

Connects channels into one continuous customer conversation, coordinating routing and workflows as interactions move across channels.

Unified Continuous Conversation

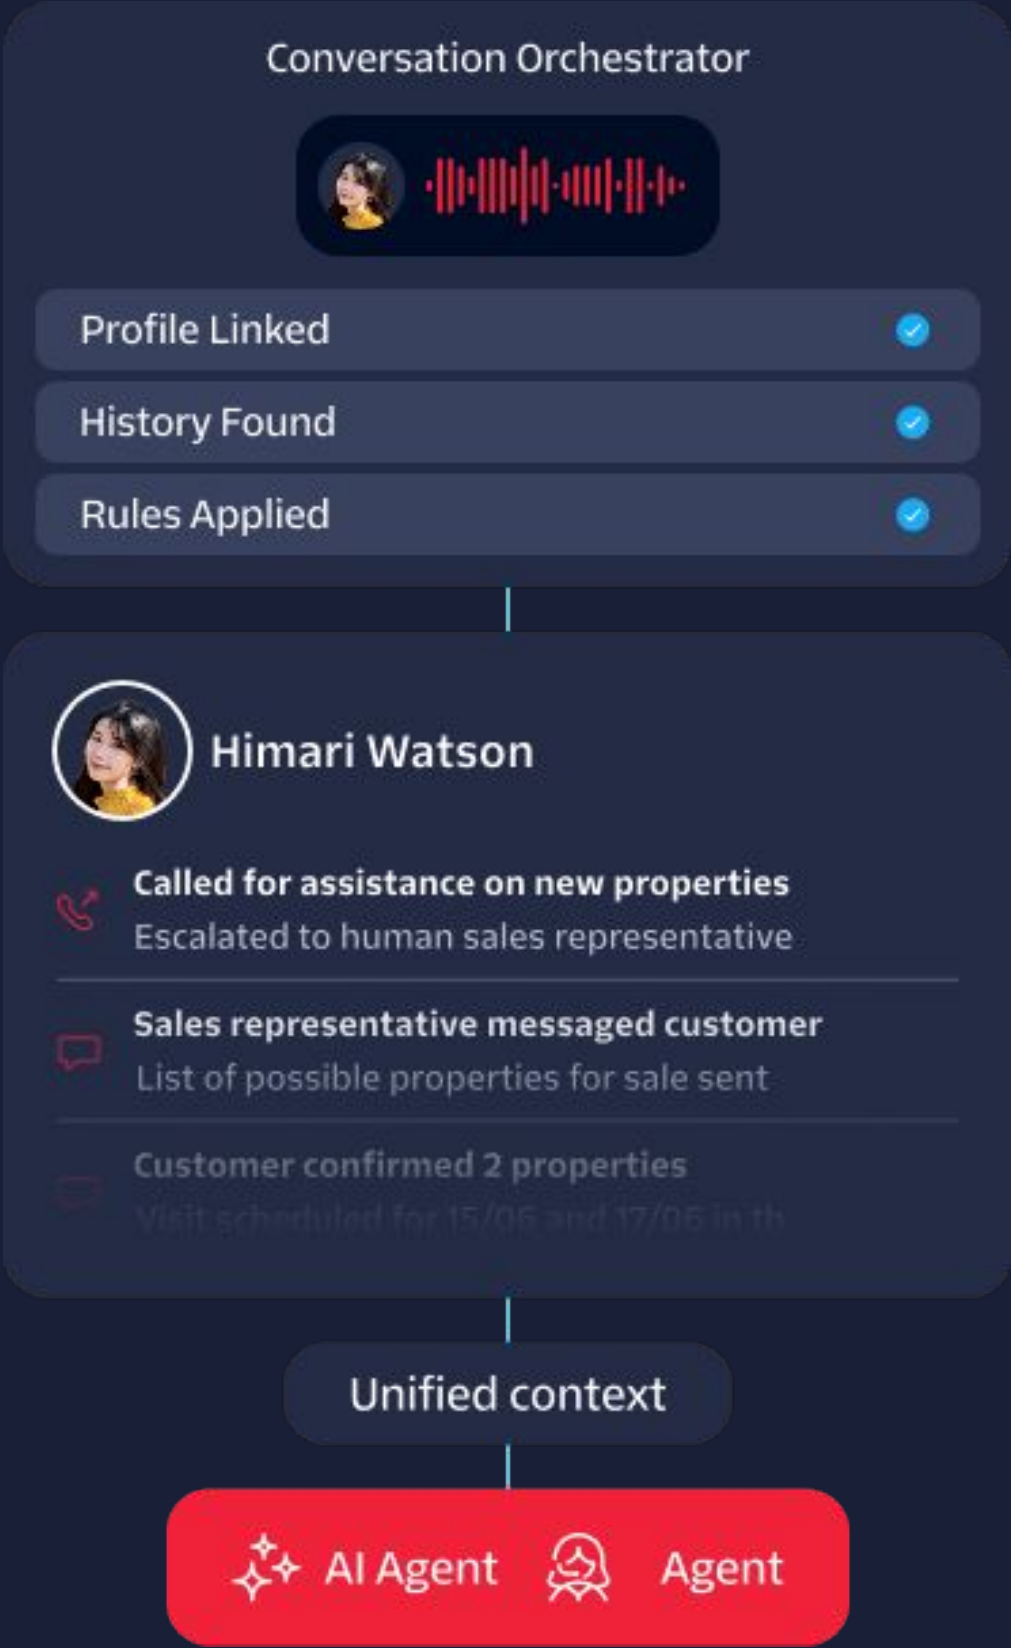

Keep every interaction connected so customers experience one continuous conversation, not separate threads.

Connected AI-Human Handoff

Smooth conversation handoffs without breaking the experience

Seamless Channel Expansion

Deploy new channels and automation without rebuilding conversation infrastructure

Conversation Memory

GA

Give every agent and team the context they need without building the memory infrastructure yourself.

AI Agents Get Long-Term Memory

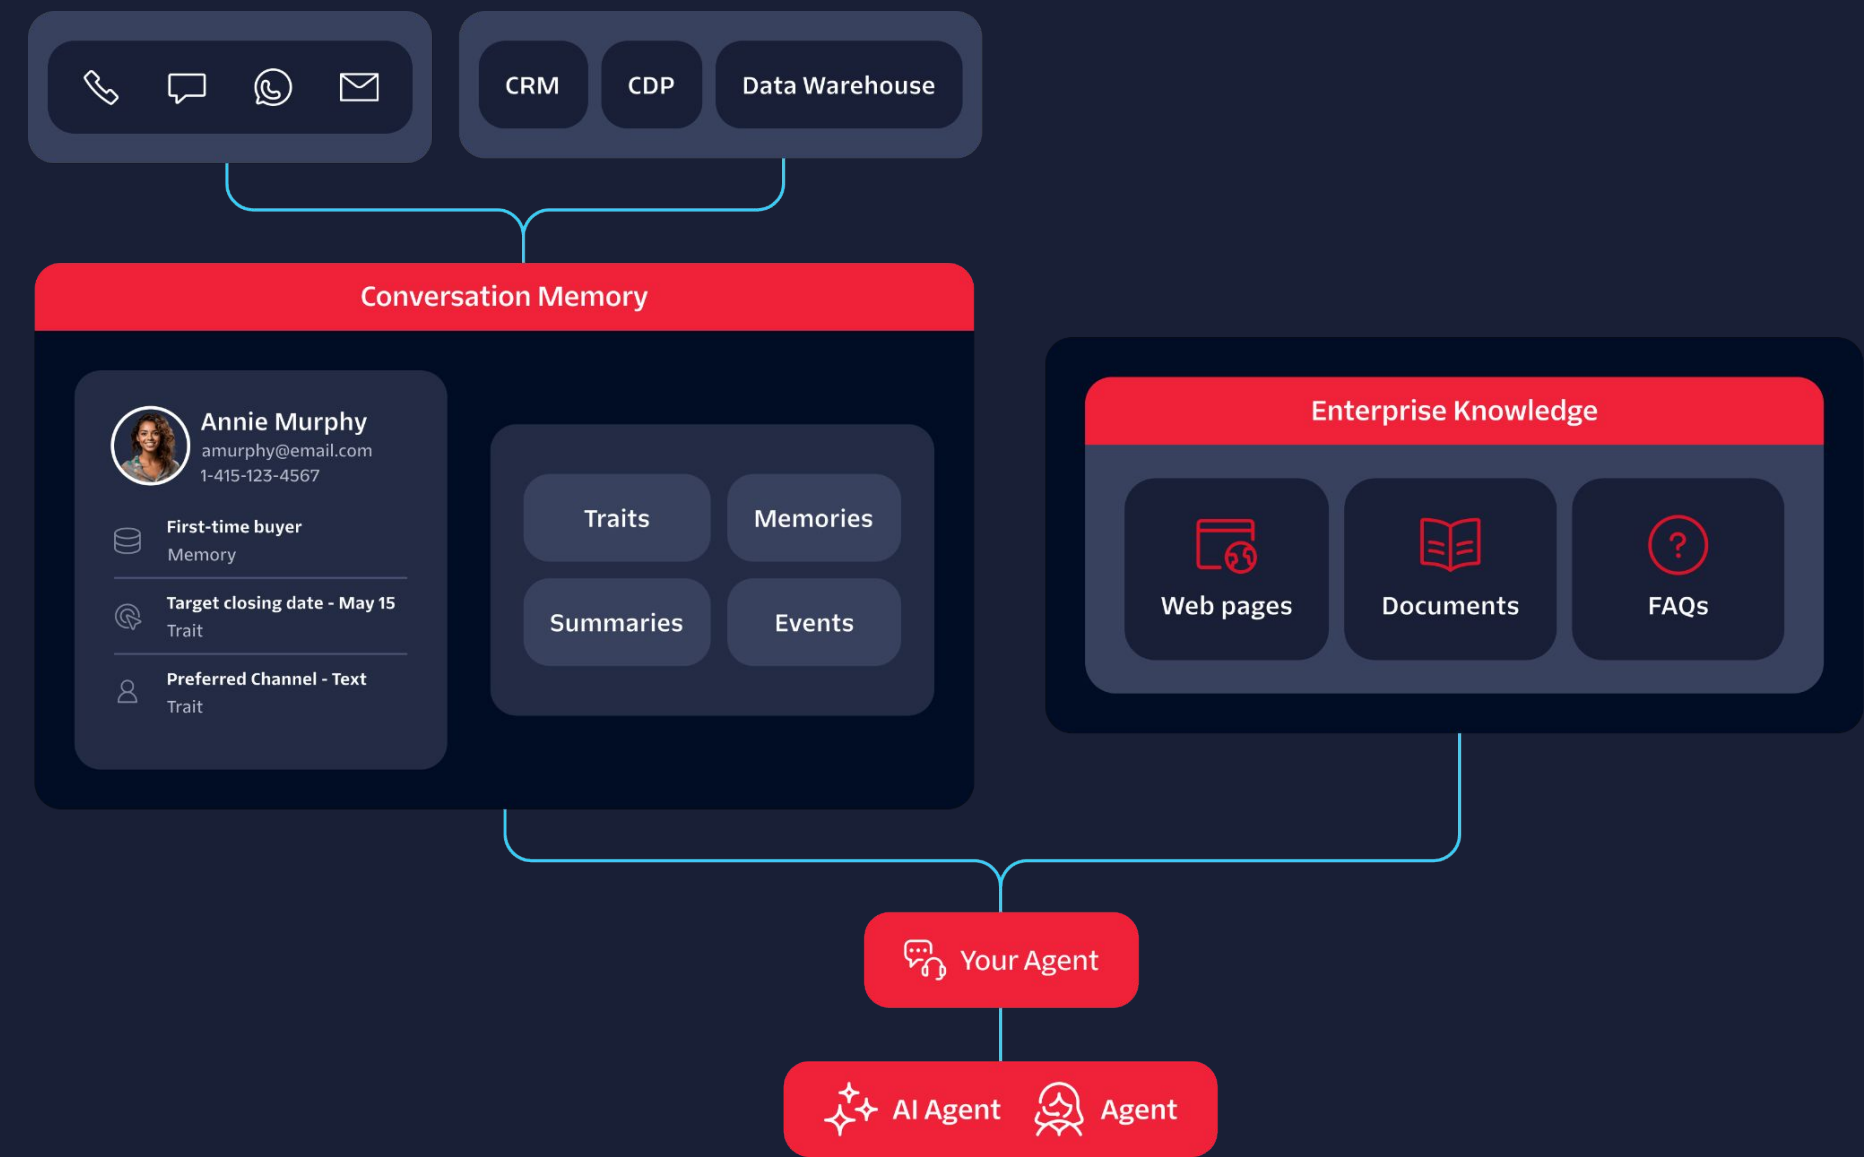

Persistent observations, identity resolution, and knowledge grounding across conversations and channels. No custom memory infrastructure required.

Human Agents Get Instant Context

Start every return interaction with what was discussed, what the customer cares about, and what needs follow-up. No more starting from scratch.

Both Get Grounded in Facts

Enterprise Knowledge indexes your policies, FAQs, and product docs. Connectors to Salesforce, Snowflake, and Segment bring in customer data automatically.

Conversation Intelligence

GA

Transform live communication streams into instant signals like intent, risk, and sentiment to trigger immediate action while the customer is still engaged.

Real-time Reasoning Engine

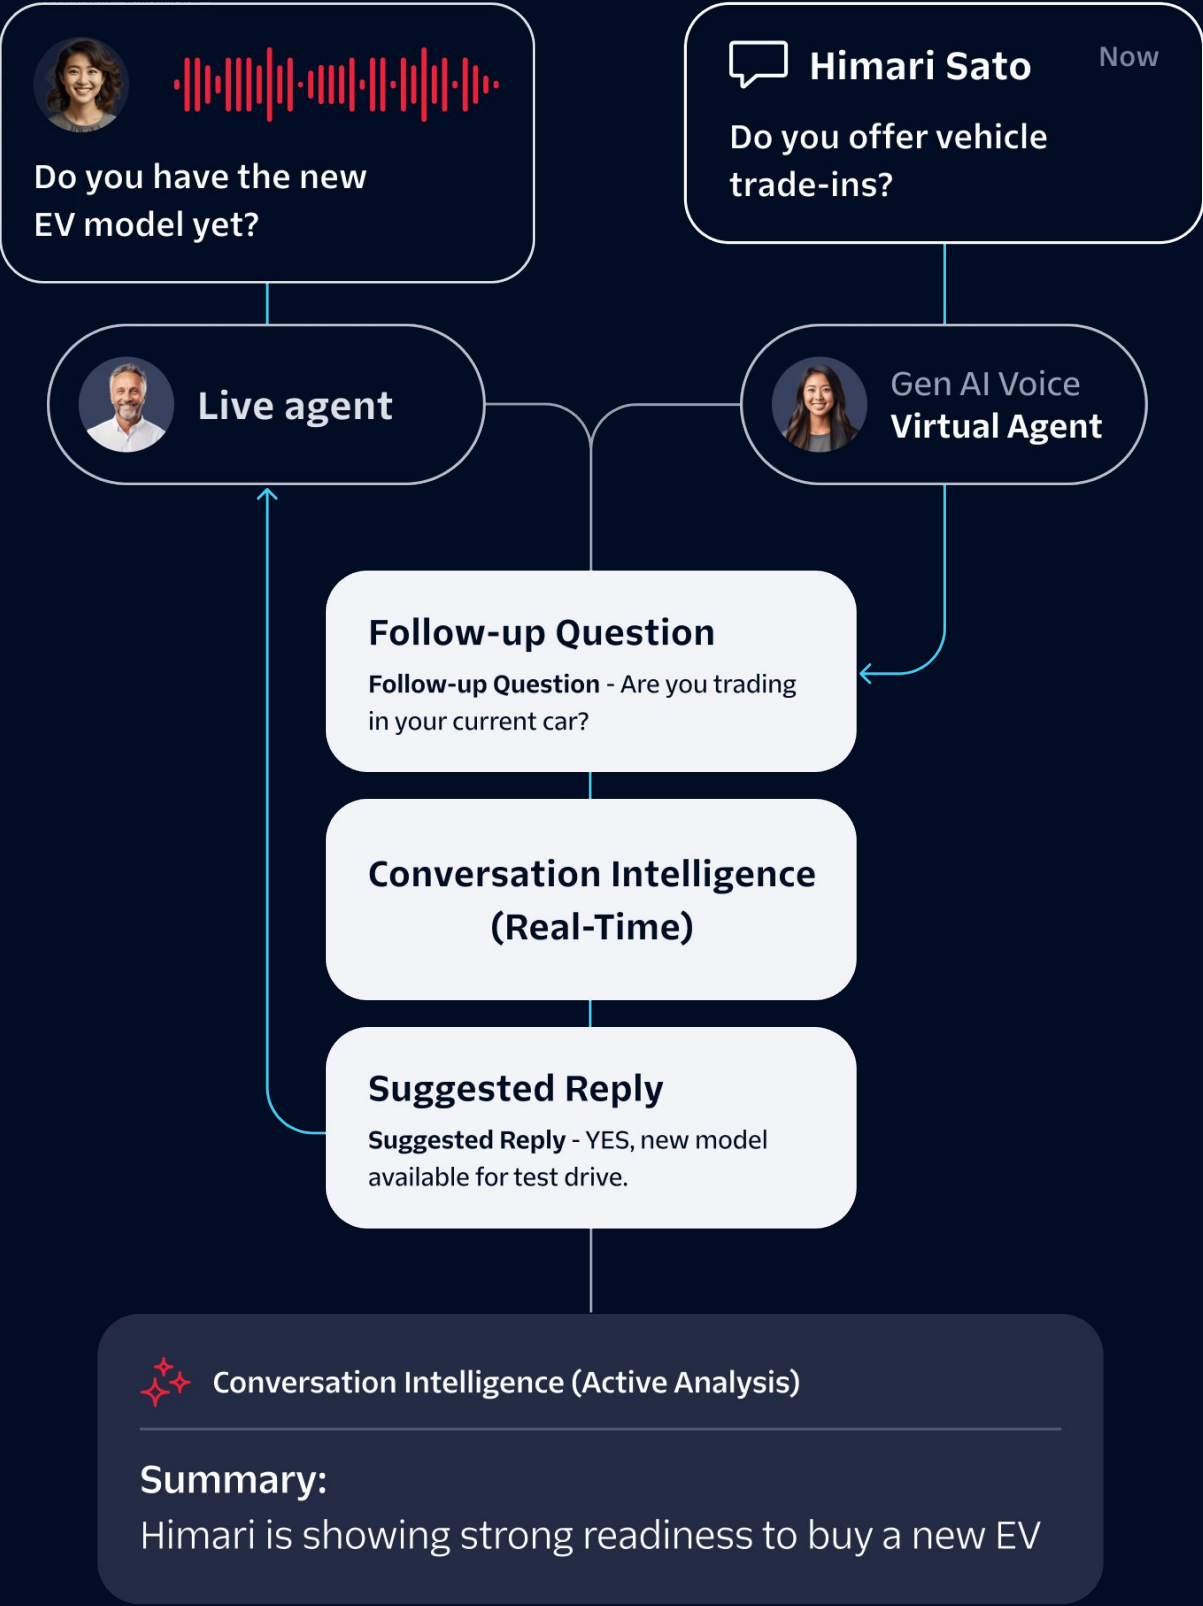

Real-time intelligence via GenAI Language Operators to drive live agent coaching, smart routing, and automated compliance.

Persistent Customer Context

Cross-channel intelligence that unifies analysis across voice and messaging—preserving context so agents never start from zero

Customer and Business Aware Guidance

Enrich interactions with customer history and enterprise knowledge to drive policy-aligned, personalized guidance.

Agent Connect

GA

A model- and platform-agnostic toolkit that bridges any AI agent to Twilio's channels to handle real-time streaming, turn-taking, and cross-channel orchestration.

Bring Your Own AI Runtime

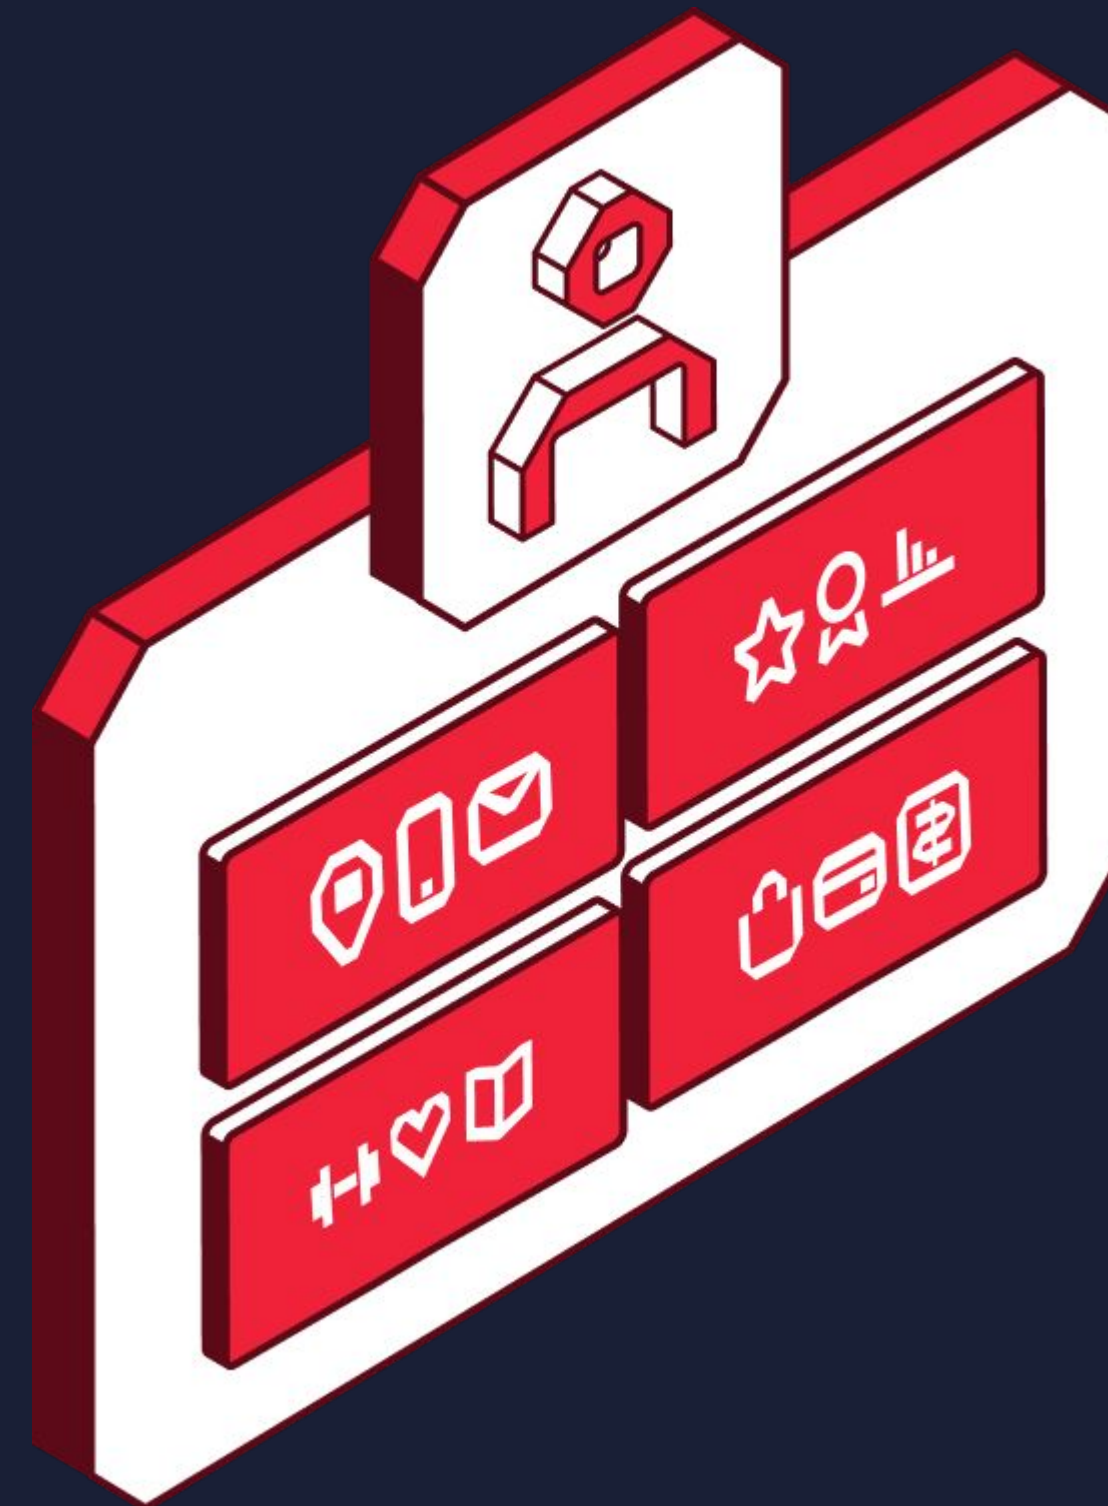

Seamlessly bridge external agents to Twilio's Voice and Messaging channels via a customer-hosted SDK that fits your existing architecture.

Seamless Real-Time Interaction

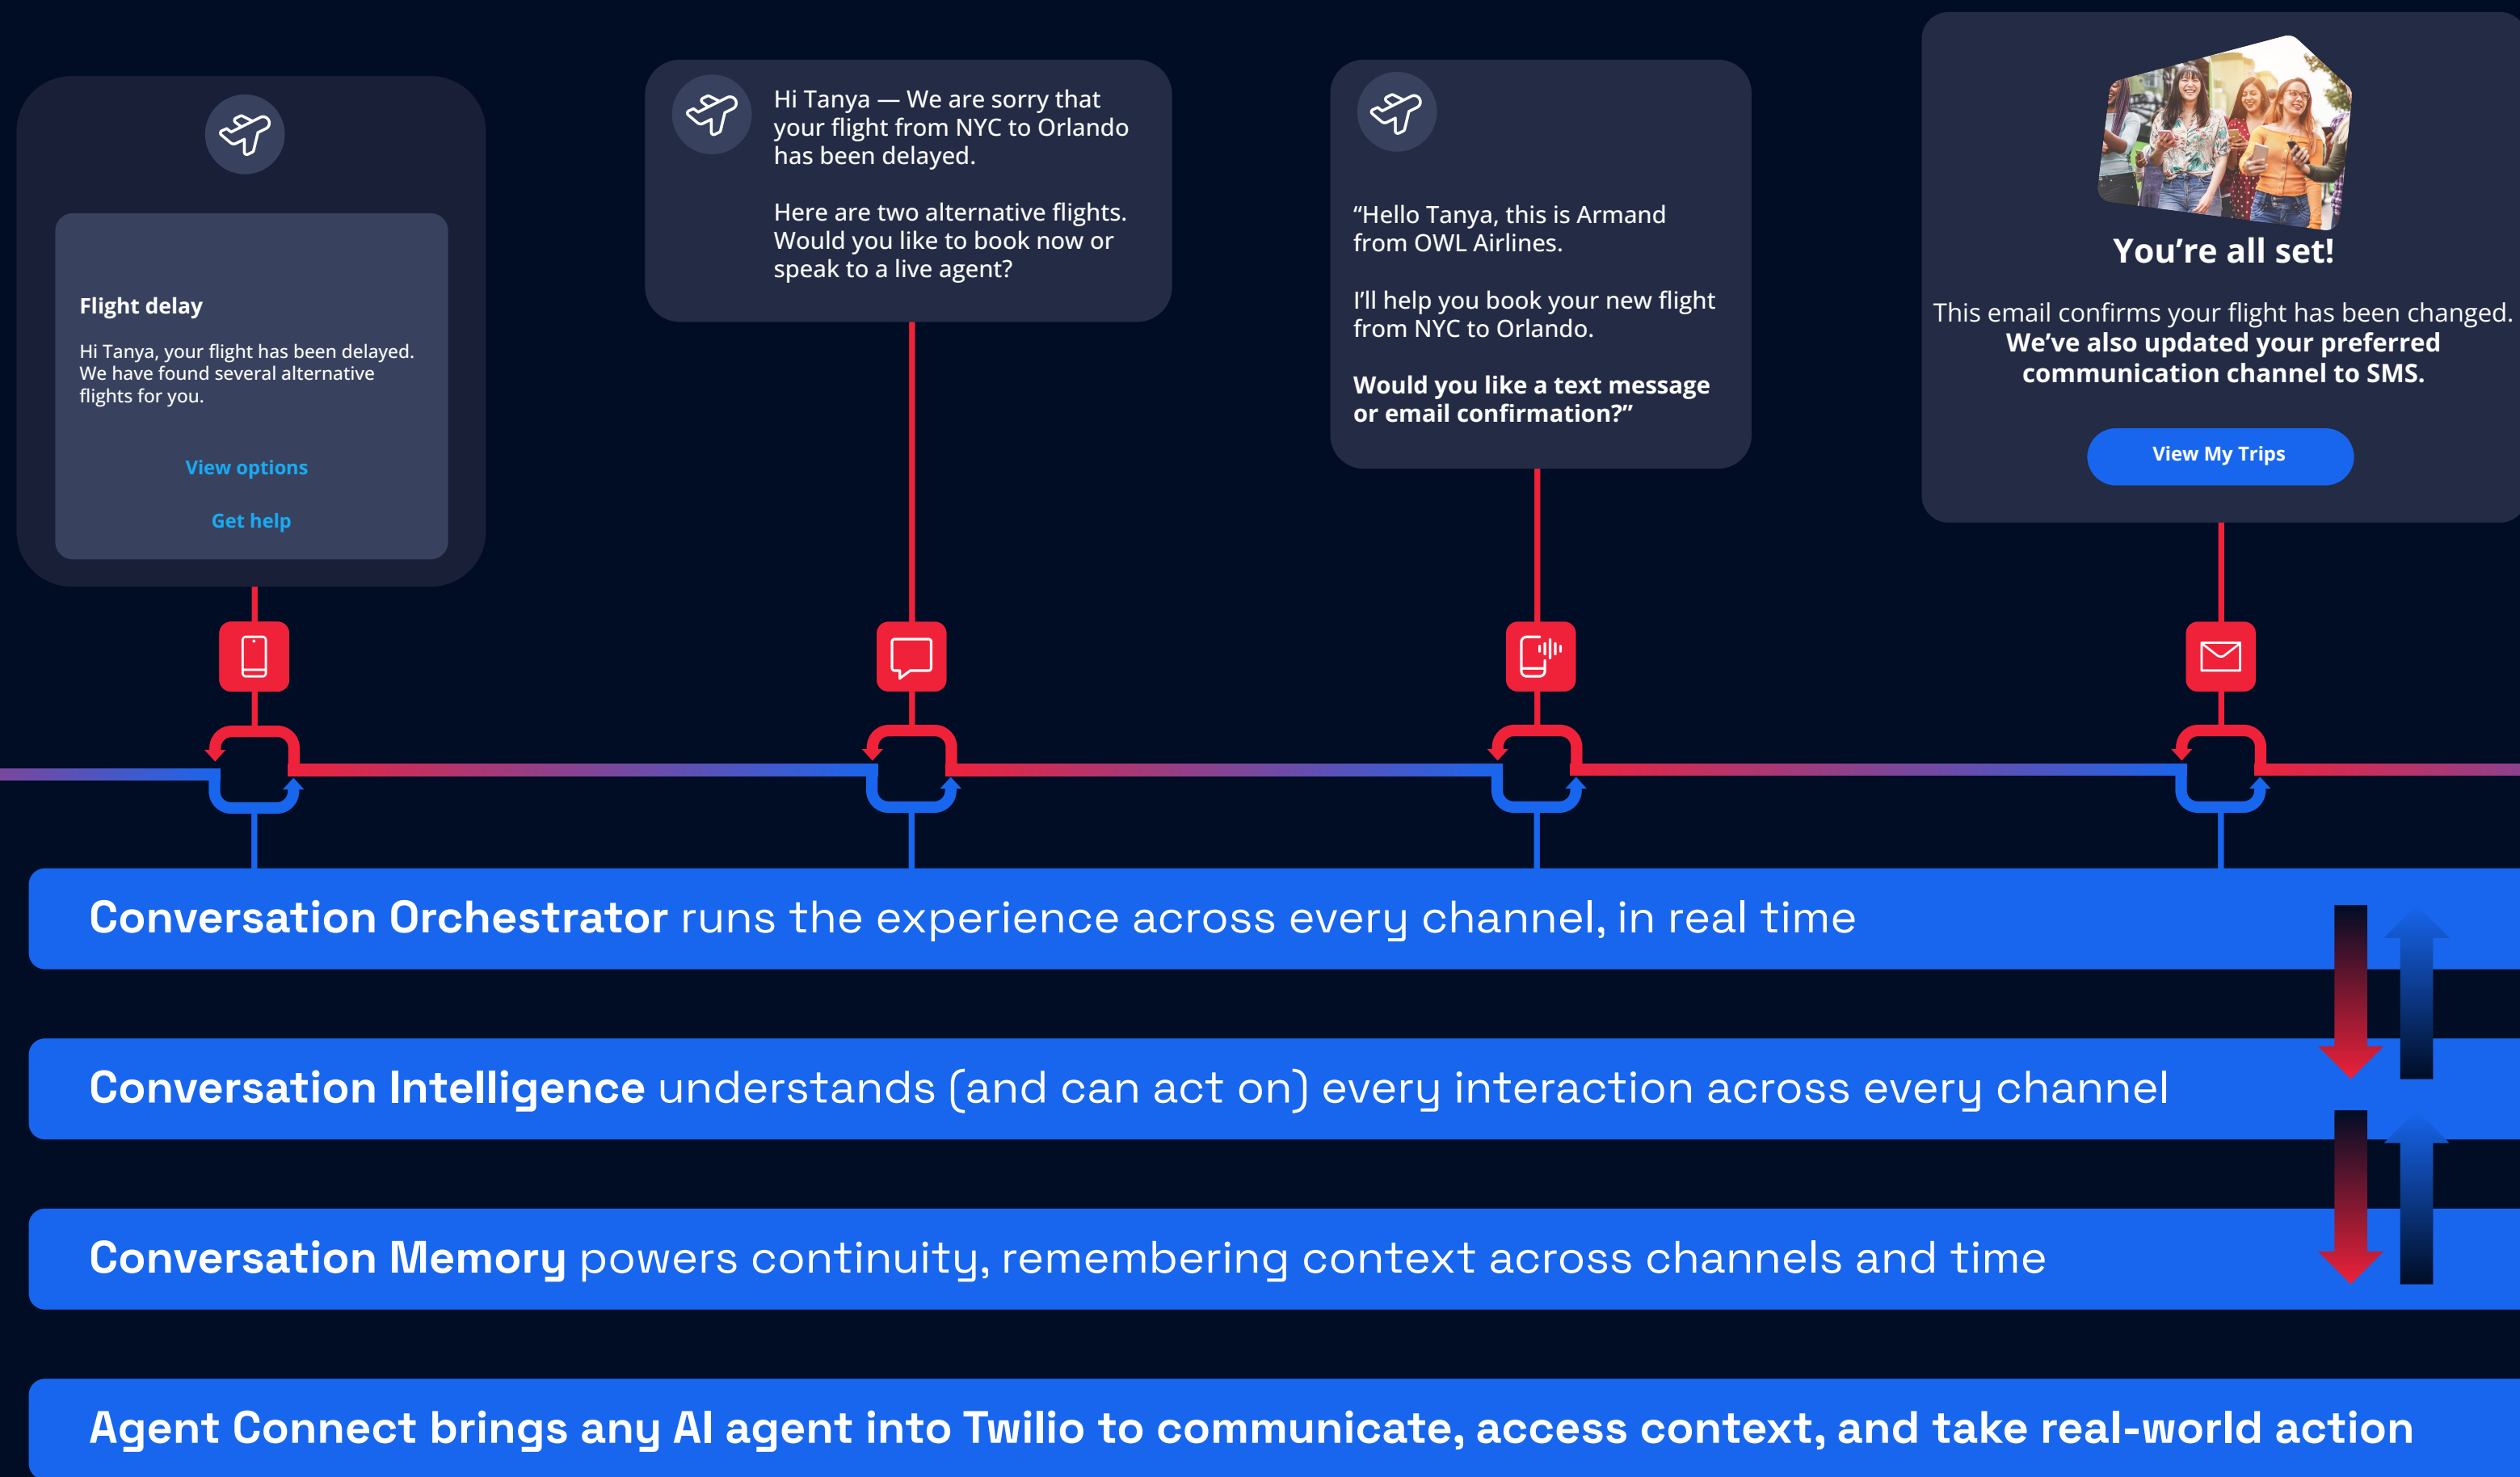

Manage turn-taking, interruptions, and channel transitions natively through Twilio's orchestration and conversation backbone

Enrich AI with Context

Power personalized service by grounding agents in customer memory and enterprise knowledge

Imagine one continuous conversation that builds on the last

Embed, embrace, and extend with Twilio

The rigid black box

- Pre-packaged and rigid
- Limited flexibility and control
- Your data, locked inside

Twilio Platform

- Flexible, composable platform
- Unified data, channels, and AI
- Enterprise scale with developer speed
- Security and compliance by design—not bolted on

The DIY build

- Disconnected tools and vendors
- Heavy lift to build and maintain
- Costly, complex, hard to scale

Powering the next generation of customer engagement

Trusted AI-driven interactions at scale

Built-in identity, security, compliance, and governance **across every channel**

Simplify AI and channel complexity

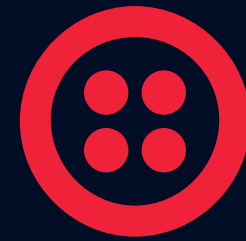

Embed into your stack, unify your channels and data, and **bring your own AI**

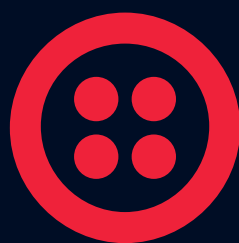

Power smarter, real-time engagement

Use context, AI, and persistent customer memory to deliver more relevant interactions

**It's never been easier to
build amazing engagement.**

Thank you
